

# Electoy headroom

// sm023 EP

## RELEASE INFO

While balancing through a more silent time, Electoy developed a fresh and reinvented sound inside. The release contains a 3-track-extract of his multifarious and music-loving symbiotic life. He appears with unknown deep-evolving dance floor affinities as well as wisely experienced changes in mood-touching and body moving works.

### Headroom

After breaking every resistance and hushing all doubts, Electoy made the mind freed to follow his perfectly tempered headroom. The walls consist of diabolic and progressive drums - give enough pressure to enjoy the heart of this track. A deep and relaxing e-piano leads an utterly tasting mixture of power and silence creating an atmosphere that gives an idea of the wideness, ones musical impressions can unfold.

### Mikado

Beginning to play, Electoy makes you starting to realize, that you're imprisoned in a wide hall - impossible to leave before the game is over. He tackles with restrained but mighty effective pad-moves, combined with a clear and exhilarating mixture of space tones, rounded by amphoral resonances. So try to win or give yourself away, to higher forces...

### Valley of hills

Straight-line climbing runs lead ones ears towards a hypnotic, nearly out-of-space oscillated session of intelligent placed switches between moving and resting elements at the same time. Subliminal sun-beams in the middle area, slowly reveal the boundless and clear view over the valley of hills.

Artist / **electoy**

Title / **headroom**

Label / **symbiont-music**
